Write your poem on the theme of
NATURE AND THE NATURAL WORLD in the box below.

The emerald plant clambers out of its seed,
Its leaves extend and its stalk ascends,
It flowers with splashes of vibrant colour,
It blooms yellow and scarlet,
The flowers are dotted with bees,
The blazing sun floods over the plant,
Its roots adventure in the soil,
But it can't last forever,
It weakens and withers,
Then it dies,
The world is dull and silent,
"Don't worry" says the empty space,
"I'll be back next spring".
